Sherrie Brownell 2.0 out of 5 stars The mechanics of the system is inferior to earlier models. I have had a Bose music system for many 20 years the earlier models have a flip up top lid that allows you to easily remove or readjust a disc that is not running properly. For the new system you insert a disc, and you cannot get into the area where the disc is. This new unit rejects any disc that is not standard so if the disc is slightly thicker it will not play. I inserted a new La Boheme CD, and the disc immediately became stuck in the unit. Over the past 6 months CDs often become stuck and I have to turn the unit off and on reset and sometimes resort to sticking an object gently into the slot to try and dislodge the CD.

Each CD must be placed into the unit with the utmost care, so that it does not go into a failure mode. Really frustrating to deal with, and the unit was 500. I know this machine will fail, and it just a matter of time. Sound is awesome, but the earlier design is so much friendlier and successful. Sure, its cool to have the one touch top for on and off, but at the expense of the unit actually playing. No way! Id rather have the old design that reliably works back. Another example of trying to make something that is attractive but doesnt really work. A gorgeous apple that when you bite into it, is bland and mealy. I big disappointment. I will go with another unit next time, if there is a competitor. This was not a feature in the first two Bose units and we do not want an alarm to sound. Bose customer service told us this was a defect, that the alarm should not sound at the end of the CD playing. We were instructed to ship it in for repair. This took quite some time. When it was returned it still sounded the alarm at end of the CD play. Our second round with Bose Customer Service initially confirmed that the alarm should NOT sound. Also, we were told that the first CS rep had not correctly recorded the defect that was supposed to be repaired. So the shipping and repair was a total waste of time and WORSE, it lulled us into delaying return of the unit through Amazon so we missed the AMAZON 30 day return deadline. After our second long phone session with another CS rep, who TWICE confirmed that alarm should NOT sound, they then changed their story to this being a new FEATURE. We asked for our money back and they refused. To be fair, the sound is good. This is what Bose was historically known for. If you want want to buy one of these units test it first at a real store and if you do buy one, buy it from a brick and mortar store where you get real customer service.

Bose customer service is a joke and you will waste your time on the phone with nice but totally ineffective telephone operators in some other country with no knowledge of the product and no
