The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers and factors that establish reviewer trustworthiness. So I searched around and found this amp with a lot of good reviews. Just wired it up and wow. Subs got tons of power and sound great. Sorry, we failed to record your vote. Please try again Easy to tune does not get hot. Check my pictures out. Update. Running it at 1ohm tried 2ohm at first but really came alive at 1ohm. Ive had this since around october of last year 2010. Pounds without trying. Sorry, we failed to record your vote. Please try again Ive used it for over 2 years and its still going strong. HOWEVER, I am updating this review with information regarding what Ive discovered about its actual power output. I purchased a This Boss amp has two input ranges 100mV2V and 2V8V, so I tried both and found that the 100mV2V range works the best for me, even with a speakerlevel signal. What this means is that you can hook this amp directly to your factory sound system without the need to run extra signal cables to your head unit, and you dont even need a speakerleveltolinelevel convertor. The remote level control is

great. <http://gaadibazarmela.com/userfiles/craftsman-15-1-2-drill-press-manual.xml>

I use it all the time because some songs need more bass than others but I wish it had a wider range. The lowest setting isnt low enough, and if I tune my system so that the lowest setting is normal, then the highest setting isnt high enough. One strange thing. Mine came with the Boss logo replaced with a different logo, and the Boss name was sanded off the remote level control. I bought it from Gooddeals18 here at Amazon. Other than that, the amp looks the same as the one in the pictures. I have used the amp to power two JL Audio 12W6s with all the coils wired in parallel, presenting the amp with a 1.5 ohm load. So far so good. The amp doesnt shut off if I turn it up, so its protection circuit doesnt have any issue with the 1.5 ohm load. Sorry, we failed to record your vote. Please try again My cars sound is the best now Sorry, we failed to record your vote. Please try again Good sound quality and lots of tuning can be done too. Good purchase.
